Users Accounts

Access WITH or WITHOUT password

..: The software can be configured *WITH password* or *WITHOUT password*, at your choice.
This configuration can be modified with the menu [Management Tools] in the top of the screen.

Note–When the software is configured *WITH password*, only the user *administrator* can modify this type of access.

..: When the software is configured *WITH password*, the user must obligatorily enter a user name and a password to open the software.

..: The software includes two (2) default accesses:

user name: demo
password: demo

and

user name: admin
password: admin
