## Users Accounts

### Access WITH or WITHOUT password

---

..: The software can be configured *WITH password* or *WITHOUT password*, at your choice.

This configuration can be modified with the menu [Management Tools] in the top of the screen.

**Note**—When the software is configured *WITH password*, only the user *administrator* can modify this type of access.

..: When the software is configured *WITH password*, the user must obligatorily enter a user name and a password to open the software.

..: The software includes two (2) default accesses:

*user name:* demo  
*password:* demo

*and*

*user name:* admin  
*password:* admin
