# Users Accounts

## Access WITH or WITHOUT password

..: The software can be configured *WITH password* or *WITHOUT password*, at your choice.
This configuration can be modified with the menu [Management Tools] in the top of the screen.

**Note**–When the software is configured *WITH password*, only the user *administrator* can modify this type of access.

..: When the software is configured *WITH password*, the user must obligatorily enter a user name and a password to open the software.

..: The software includes two (2) default accesses:

*user name*: demo
*password*: demo

*and*

*user name*: admin
*password*: admin
